PROJECT SUPPORT

Our project support tailors solutions to your project needs. With your own project team in place we can support them; if you need a team we can provide the resource. We can complete all the planning, costing and preparation to start your new roll-out project then handing over to your team.

Using our support means that your project teams can be more flexible, and focused on the critical business functions. Our support gives you the ability to plan and resource your projects in a more cost effective and timely manner.

- Client side project management
- Project Control
- Support to your project manager
- Engineering Programs
- Construction/renovation/maintenance programs
- Relocation co-ordination
- Sourcing consultants and suppliers
- Site preparation
- Pre Project planning
- Project Costing
- Management liaising on behalf of your company
- Submissions for licensing/incentives/regulatory requirements
- Resource support for project roll-outs
- Project review and process audit to verify plans are viable, on track and effective
